

BLESSED & DRESSED

MASTER CLIENT SPECIFICATION — v3

Client	Supplier / Account	Date	Status
Dustin Chase Stanley (Chase)	Kutesmart — LABDP	2026-08-16	ACTIVE MASTER

All measurements in cm unless noted. Ease = finished – body. This document supersedes v1/v2 and all prior order specs.

1. BODY BASELINE

Measurement	cm	Measurement	cm
Chest	111.8	Waist	99.1
Stomach	102.9	Seat	110.5
Stomach (highest pt)	113.0	Thigh	63.5
Neck	41.1	Knee (finished ref)	45.7
Shoulder (curve-taped)	47.0	Calf	36.8
Front shoulder	41.9	Pant bottom (ref)	36.8
Bicep	33.0	Outseam L / R	97.8 / 97.8
Wrist L / R	17.8 / 17.8	U-rise	71.1
Sleeve L / R	61.0 / 61.7	Back waist height	11.4
Nape to waist	38.1	Front waist height	14.5
Front waist length	38.6	Weight	88.5–90.3 kg
Back length (jacket/shirt)	73.7	Age	34

OPEN: height conflict — 170.2 cm on shirt/suit orders vs 175.3 cm (69 in) on pants form. Verify and correct on next login.
Also missing: across-back, inseam.

CANONICAL FIGURATION PROFILE (USE ON EVERY ORDER)

Selection	Value	Note
Head	Slightly forward	—
Neck	Slightly thin	—
L / R shoulder slope	NORMAL	Body reads slight square (high-E), but Kutesmart golden jacket proves Normal is correct. Never select Sloping.
Front shoulder	Very Forward	Upgraded from Forward on 1102483292 — kept
Arm	Generally advanced, bent arm 1.0	—
Chest	Out / slightly pectorales	—
Seat	Normal	Never Flat, never Portly belly
Belly	Normal (fat around)	—
Waist height	Higher 2.0 cm (back)	Trousers

2. PROVEN GOLDEN GARMENTS (EASE FINGERPRINT)

GOLDEN SHIRT — CONFIRMED BEST FIT

Point	Body	Finished	Ease
Neck	41.1	42.0	+0.9
Chest	111.8	118.2	+6.4
Stomach	102.9	121.0	+18.1 (trim to +12-14 next)
Seat	110.5	118.5	+8.0
Bicep	33.0	41.0	+8.0
Shoulder	45.0 (functional)	45.0	0.0
Sleeve L / R	61.0 / 61.7	61.5 / 62.5	+0.5 / +0.8
Cuff L / R	—	25.3 / 25.9	—
Back length	—	76.2	—
Front length	—	81.3	—

Shirt adjustments: head slightly forward · neck slightly thin · shoulders Normal · forward shoulder · arm slightly thin + forward · armhole up 2 · slightly pectorales.

GOLDEN JACKET — ORDER 1102455950, FABRIC RMB25E316

Point	Body	Finished	Ease
Chest	111.8	120.0	+8.2
Stomach	102.9	109.0	+6.1
Belly (highest pt)	113.0	115.0	+2.0 — tightest margin
Seat	110.5	118.0	+7.5
Bicep	33.0	41.0	+8.0
Shoulder width	45.0 (functional)	44.5	−0.5
Back width	—	46.5	—
Sleeve L / R	61.0 / 61.7	61.0 / 62.0	≈0
Back length	—	72.5	—
Front length	—	75.0	Front–back balance +2.5
Cuff	—	28.0	—
Button stance	—	39.0	—

NEWEST JACKET — ORDER 1102483292, FABRIC RMB25E315

Verdict: fits perfect EXCEPT one horizontal fold across the upper back just below the collar.

Diagnosis: shoulder SLOPE selection, not width. This order set L/R shoulder = Slightly Sloping on a square-ish body (slope reads slight high-E). The jacket was cut with more shoulder slope than the body has, so the shoulder ends prop the jacket up and the cloth collapses below the collar. The golden jacket used Normal shoulders and had no fold. Fix: revert L/R shoulder to Normal; keep every other setting from this order (front chest −1.5, stomach dart 0.5, bent arm 1.0, Very Forward shoulder). One variable per iteration.

3. NEXT-SUIT ORDER SPEC — COPY EXACTLY

JACKET — FINISHED MEASUREMENTS

Point	Enter	Why
Full chest	120.0	Golden, unchanged
Full stomach	109.0	Golden, unchanged
Full belly	116.0	+1 over golden's 115 — belly ease was tightest margin (+2.0)
Full seat	118.0	Golden, unchanged
Full bicep	41.0	Golden, unchanged
Full cuff	28.0	Golden, unchanged
Shoulder width	44.5	Golden, unchanged — do NOT narrow further
Back width	46.5	Golden, unchanged
Sleeve L / R	61.0 / 62.0	Golden, unchanged
Back length	72.5	Golden, unchanged
Front length	75.0	Preserves +2.5 front–back balance
First button stance	39.0	Golden, unchanged

JACKET — BODY ADJUSTMENT TAB

Selection	Enter	Why
L shoulder	NORMAL	THE FIX — reverts the fold
R shoulder	NORMAL	THE FIX — reverts the fold
Front shoulder	Very Forward	Keep from 1102483292
Arm adjustment	Generally advanced	Keep
Bent arm	1.0	Keep
Armhole depth	Up 2.5 cm	Keep
Front chest	–1.5 cm	Keep
Stomach dart	0.5 cm	Keep
Head / neck	Slightly forward / slightly thin	Keep

TROUSERS — FINISHED MEASUREMENTS

Point	Enter	Why
Full waist	99.0	Body +0 works with adjusters; do not go below
Full seat	117.5	+7.0 ease — pair 2's 115 caused pull-down + thigh folds
Full thigh	69.5	+6.0 — seated thigh expands 3–5 cm
Full knee	46.5	Slim taper
Full opening	37.0	Must clear calf 36.8 — pair 2's 36 did not
U-rise	74.5	+3.4 ease — THE seated-comfort number. Pair 2 had 0.0
Front rise	26.0	Confirmed good
Back rise	45.5	Raised — back path length for sitting
Pant length L / R	97.8 / 97.8	Equalized (verify legs truly equal)

TROUSERS — BODY ADJUSTMENT TAB

Selection	Enter	Why
Low hips	NORMAL — remove Very Low	Very Low drops the waistband = steals rise
Flat hips	REMOVE (no straightening)	Straightening the back crotch shortens the seat

Well-toned bott	Slightly (back crotch curved 0.5)	Adds seated seat length
Front centre height	3 cm (keep)	—
Waist height	Higher 2.0 cm back only	Anchors waistband when seated
Seat / belly	Normal / Normal	Never Flat, never Portly

PRE-SUBMIT CHECKLIST

✓	Check before pressing Submit
☐	Screenshot the Body Adjustment tab and diff line-by-line against this document
☐	L/R shoulder both read NORMAL (jacket)
☐	No Portly / Flat Hips / Very Low Hips anywhere
☐	U-rise ≥ 74 , back rise ≥ 45.5 , opening ≥ 37 (trousers)
☐	Outseams equal 97.8 / 97.8
☐	Height field corrected after verification (170.2 vs 175.3 conflict)
☐	Only ONE variable changed vs the last garment that fit

4. ITERATION & DIAGNOSIS LOG

Garment	Result	Root cause / action
Shirt (golden)	Best fit — reference	Ease fingerprint captured; stomach could trim to +12-14
Jacket 1102455950 (golden)	Fits very well	Reference. Shoulders NORMAL. Belly ease +2.0 tightest
Jacket 1102483292	Perfect except horizontal fold below collar	Slightly Sloping shoulder on square body — revert to Normal, keep all other new settings
Trouser pair 1 (w/ suit)	Pulled down badly when sitting	Order 2503002 posture wrong (Portly belly, Flat seat, arm backward); U-rise +1.9 only; opening 36 < calf 36.8
Trouser pair 1 review	Good, slightly large; fabric pooling under front waistband	Waistband pitch: front rise −1 to −1.5, back rise +2 to +2.5
Trouser pair 2	Still pulls down; horizontal/diagonal folds on front thigh seated	Wrong direction: U-rise ease 0.0, seat cut to +4.5, back crotch straightened, Very Low hips. Corrected spec in §3

STANDING RULES LEARNED

Rule
1. Profile selections sabotage good numbers — the posture tab has caused every failure to date. Diff it before every submit.
2. One variable per iteration. Two changes = undiagnosable result.
3. Sitting needs 3-5 cm of back-path length: U-rise ease $\geq +3$ and back rise ≥ 45.5 are non-negotiable for the slim trouser goal.
4. Horizontal fold below jacket collar = shoulder slope cut greater than body. Vertical ripple off shoulder ends + collar gap = the reverse.
5. Opening must clear the calf (36.8) or the trouser leg binds — floor is 37.
6. Kutesmart 'shoulder' body reading (47.0) is curve-taped; functional shoulder is 45.0. Order against 44.5-45.0 finished.
